

VERSATILE PRODUCTION SOLUTIONS AT YOUR FINGERTIPS

Canon's family of CINE-SERVO lenses provides outstanding versatility and 4K optical performance ideal for cinema, broadcast and other applications where servo zoom is needed. Lightweight and compact, they can be ideal for shooting scenarios where mobility is key. They feature an 11-blade aperture diaphragm for beautiful bokeh and a dust- and water-resistant design for use in even difficult environments. The servo drive unit is compatible with industry-standard protocols for control from a number of lens controllers, including Canon's standard broadcast lens controllers and multiple industry standard cinema lens controllers. The drive unit can be easily removed for cinema-style shoots and can be just as easily re-attached without any manual realignment. Together, this family of lenses covers a broad focal range and offers a dynamic solution for a multitude of production scenarios.

- **Outstanding Optical Performance to Support 4K Cameras**

- High resolution and warm natural tone
- Unified warm color balance
- Minimized focus breathing

- **11-blade Iris**

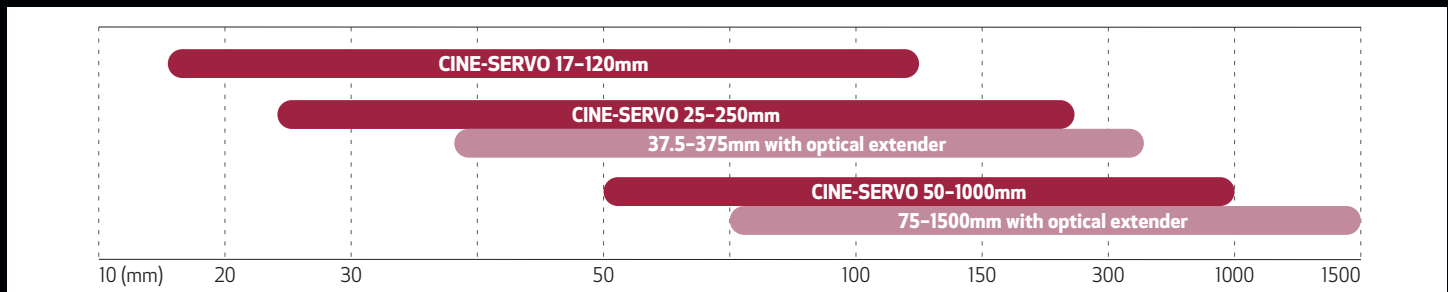

- **Ideal for Both Broadcast and Cinema Applications**

- Compatible with broadcast zoom and focus demands
- Ergonomically ideal for ENG/EFP shooting
- Removable servo drive unit for manual operation
- Focus and zoom rings designed for compatibility with cinema accessories

- **Broad Focal Range**

- Family of lenses covers from 17mm to 1500mm
- Minimal ramping on telephoto end
