Instruction Manual

● Content of this Instruction Manual

- EU is used for EOS Utility.
- Camera model is displayed as an icon.
  Example: EOS-1D Mark IV → 1D Mk IV
- 📷 displays the relevant camera model.
- In this manual, the windows used in the examples are from Windows Vista.
- The selection sequence of menus is displayed in ▶ procedures.
  (Example: Select the [Window] menu ▶ [Main Window].)
- Square brackets are used to indicate items such as menu names, button names and window names that appear on the computer screen.
- Text inside < > indicates a camera switch name or icon, or a keyboard key name.
- ** indicates a reference page.
  Click to move to the relevant page.
- ⚠️ : Marks information that should be read before use.
- 📄 : Marks additional information you may find helpful.

● Switching Between Pages

- Click on arrows on the bottom right of the screen.
  ▷ : next page
  ◁ : previous page
  ↩ : return to a page you had previously displayed
- Click on the chapter headings on the right side of the screen to switch to the contents page of that chapter. Also, click the item you want to read about on the table of contents to move to the relevant page.
READ CAREFULLY BEFORE USING!

CANON SOFTWARE LICENSE AGREEMENT

IMPORTANT - READ THIS AGREEMENT BEFORE USING THE SOFTWARE ON THE CD-ROM IN THIS BOX. BY USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT.

This is a license agreement (the [Agreement]) between you and Canon Inc. ([Canon]).

IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT USE THE SOFTWARE PROGRAM ON THE CD-ROM AND THE USER MANUAL IN THIS BOX (COLLECTIVELY, THE [SOFTWARE]) AND RETURN THE SOFTWARE WITHIN 30 DAYS FROM THE DATE OF PURCHASE TO YOUR POINT OF PURCHASE FOR A REFUND.

In consideration of the right to use the SOFTWARE, you agree to abide by the terms and conditions of this Agreement.

1. LICENSE: Canon grants you the non-exclusive right to use the SOFTWARE only on a single computer. You may physically transfer the SOFTWARE from one computer to another provided that the SOFTWARE is used on only one computer at a time. You shall not install or use the SOFTWARE on a network, multiple CPU, multiple site arrangement, or any other hardware configuration where the SOFTWARE is accessible to more than one CPU or to more than one user.

YOU SHALL NOT ASSIGN, SUBLICENSE, RENT, LEASE, LOAN, CONVEY OR OTHERWISE USE, TRANSFER, COPY, TRANSLATE, CONVERT TO ANOTHER PROGRAMMING LANGUAGE, ALTER, MODIFY, DECOMPILE OR DISASSEMBLE THE SOFTWARE, IN WHOLE OR IN PART, EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT.

2. BACK-UP COPY: You may make one copy of the SOFTWARE solely for back-up purposes, or copy the SOFTWARE onto the permanent storage device (e.g. a hard disk) of your computer and retain the original for back-up purposes. Any other copying of the SOFTWARE is a violation of this Agreement. You must reproduce and include the copyright notice on the back-up copy.

3. SUPPORT AND UPDATES: Canon is not responsible for providing maintenance or support for use of the SOFTWARE. No updates, fixes or support will be made available for the SOFTWARE.

4. LIMITED WARRANTY AND LIMITATION OF LIABILITY: It is your responsibility to choose, maintain and match the hardware and software components of your computer system. Thus Canon does not guarantee uninterrupted service or correction of errors or that the functions or performance of the SOFTWARE will meet your requirements. THE SOFTWARE IS LICENSED ON AN [AS IS] BASIS AND WITHOUT WARRANTY OF ANY KIND. The CD-ROM storing the SOFTWARE is warranted only against defective material under normal use for a period of ninety (90) days after purchase from an authorized Canon dealer as evidenced by your sales receipt. Your sole remedy for a defective CD-ROM shall be replacement of the same without charge when returned by you at your expense to your point of purchase and proven to be defective upon inspection. The replacement CD-ROM will be warranted for the remainder of the original ninety (90) day warranty period of the defective CD-ROM. The limited warranty does not apply if the failure of the CD-ROM resulted from accident, abuse or misapplication of the SOFTWARE and shall not extend to anyone other than the original user of the SOFTWARE.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS PARAGRAPH 4, CANON, CANON'S SUBSIDIARIES, DISTRIBUTORS AND DEALERS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SOFTWARE.

NEITHER CANON NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS IS LIABLE FOR ANY DAMAGES HOWSOEVER CAUSED, INCLUDING WITHOUT LIMITATION, DIRECT, CONSEQUENTIAL OR INCIDENTAL LOSS OR DAMAGE INCLUDING LOSS OF PROFITS, EXPENSE OR INCONVENIENCE HOWSOEVER CAUSED OR ARISING OUT OF THE SOFTWARE OR THE USE THEREOF.

NEITHER CANON, NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS SHALL HAVE ANY OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE OR THE USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

5. TERM: This Agreement is effective upon your using the SOFTWARE and remains in effect until expiration of all copyright interests in the SOFTWARE unless earlier terminated. You may terminate this Agreement by destroying the SOFTWARE. This Agreement will also terminate without notice to you if you fail to comply with any of the terms of this Agreement and you must then promptly return the SOFTWARE. In addition, Canon may enforce its other legal rights.

6. U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE: The SOFTWARE is provided with restricted rights. Use, duplication or disclosure is subject to restrictions as set forth in either subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer software clause at DFARs 252.227-7013 or subparagraph (c) (1) and (2) of the Commercial Computer Software Restricted Rights Clause at FAR 52.227-19, as applicable.

7. SEVERABILITY: In the event that any provision of this Agreement is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this Agreement shall remain in full force and effect.

8. CONTROLLING LAW: The terms of this Agreement as it relates to purchases of the Software in the United States of America shall be governed and construed in all respects in accordance with the laws and regulations of the State of New York, without reference to choice of law principles. The terms of this Agreement as it relates to purchases of the Software in Canada shall be governed by the laws of the province of Ontario.

9. OWNERSHIP: All rights, including but not limited to copyrights and trade secret rights, to the SOFTWARE belong to Canon, its affiliated corporations and third party licensors. Your use of the SOFTWARE is subject to the United States, Canada and other applicable copyright and trademark laws and nothing in this Agreement constitutes a waiver of the rights of Canon, its affiliated corporations and third party licensors under such laws.
Nothing contained in Paragraph 1 shall be construed to give Canon any ownership rights in any images, graphics or textual material that you save in connection with the Software.

10. ACKNOWLEDGEMENT: BY USING THE SOFTWARE, YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTOOD IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU ALSO AGREE THAT THIS AGREEMENT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN YOU AND CANON CONCERNING THE SUBJECT MATTER HEREOF AND SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, VERBAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER HEREOF. NO AMENDMENT TO THIS AGREEMENT SHALL BE EFFECTIVE UNLESS SIGNED BY A DULY AUTHORIZED OFFICER OF CANON.

Introduction

EOS Utility (hereinafter EU) is software for communication with your EOS DIGITAL camera. By connecting the camera and computer with the cable provided with the camera, you can download to your computer images saved in the camera's memory card as well as set various camera settings or shoot remotely from EU on your computer.

Main Features of EU

From EU, you can control the camera remotely and perform the following main features.

● **Batch download to your computer images saved in the camera's memory card.**
  ● You can also download to your computer only images you have selected.

● **Set various camera settings from your computer.**

● **Shoot remotely by controlling the camera from your computer.**
  ● Remote Live View shooting – Shoot while checking your subject in real time on your computer.
  ● You can also shoot remotely by operating the camera's shutter button.
  ● Preset a time allowing the camera to shoot automatically with timer shooting.

● **When downloading images or shooting remotely, view/check images with the linked Digital Photo Professional.**

System Requirements

OS	Windows 7^{*1} Windows Vista^{*2} Windows XP Professional/Home Edition^{*3}
Computer	PC with one of the above OS preinstalled and a USB port as a standard feature (Upgraded machines not supported) * .NET Framework 2.0 or later is required.^{*4}
CPU	1.3GHz Pentium or higher
RAM	Minimum 1GB
Interface	Hi-Speed USB
Display	Screen resolution: 1024 × 768 pixels or more Color quality: Medium (16 bit) or more

^{*1} Compatible with 32-bit/64-bit systems for all versions except Starter Edition
^{*2} Compatible with 32-bit/64-bit systems for all versions except Starter Edition (Also compatible with Service Pack 1)
^{*3} Compatible with Service Pack 2/Service Pack 3
^{*4} .NET Framework is Microsoft software. It is installed together with EU.

Supported Camera

Can be used for RAW images, JPEG images or MOV movies shot with the cameras below.

EOS-1D Mark IV	EOS-1Ds Mark III
EOS-1D Mark III	EOS 5D Mark II
EOS 7D	EOS 50D
EOS 40D	EOS REBEL T2i/550D
EOS REBEL T1i/500D	EOS DIGITAL REBEL XSi/450D
EOS DIGITAL REBEL XS/1000D	–

Basic operation such as preparing for downloading images to your computer (connecting your camera and computer), starting up EU, downloading images from your camera to your computer and exiting EU are explained here.

Connecting the Camera and Computer

To download to your computer images shot with your camera, you will need to connect your camera and computer using the interface cable provided with your camera.

1 Connect the large plug of the cable into the USB port of your computer.
● For the location and direction of the USB port, refer to the computer User's Manual.

2 Connect the small plug of the cable into the terminal on your camera.

● Once the plug is connected to the camera according to the steps for your camera model, preparation for downloading images is complete. Continue with "Starting up EU".

[1D Mk IV]

● With the < ⟨⟨ > mark on the plug facing the back of the camera, connect it to the camera's <A/V OUT / DIGITAL> terminal.
[1Ds Mk III] [1D Mk III]

● With the < ⟨⟨ > mark on the plug facing the front of the camera, connect it to the camera's < ⟨⟨ > terminal.
Cameras other than [1D Mk IV] [1Ds Mk III] [1D Mk III]

● With the < ⟨⟨ > mark on the plug facing the front of the camera, connect it to the camera's < ⟨⟨ > terminal or <A/V OUT / DIGITAL> terminal.
📝 With [1D Mk IV] [1Ds Mk III] [1D Mk III] , you can fix the plug to the camera with the cable protector to prevent the plug from disconnecting. For details on using, refer to .

5
Starting up EU

When the camera's power switch is set to < ON >, EU will start up, and the camera and computer will be able to communicate.

1 Set the camera's power switch to < ON >.
→ Communication between the camera and the computer begins and the dialog box in step 2 is displayed.

● If the window in step 2 is not displayed even when you set the camera's power switch to < ON >, double-click the [EOS Utility] icon on your desktop to start up EU.

● REBELT1i 500D cannot communicate with EU if the camera's mode dial is set to < 🎬 >. Set the mode dial to a mode other than < 🎬 >.

2 Click [Downloads images from EOS camera].
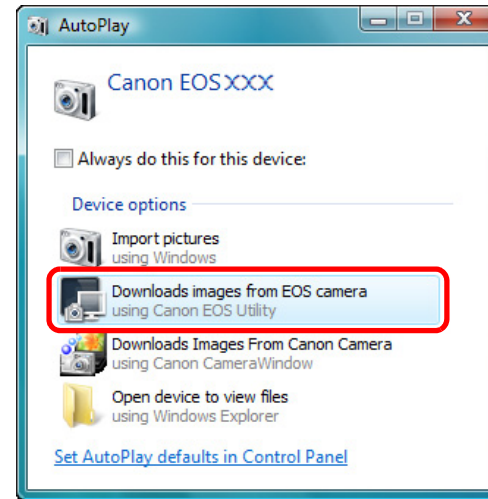

EU Main window
→ EU starts up, the main window appears, and your camera and computer can now communicate. Continue with "Batch Downloading Images to Your Computer".

● In Windows XP, select [Canon EOS Utility] and then click the [OK] button to start up EU.

● When [Always do this for this device] ([Always use this program for this action] in Windows XP) is checkmarked, from the next time you connect your camera and computer, EU will start when you set your camera's power switch to < ON >.

● The camera's LCD monitor turns on when EU starts up.

● For cameras other than 1D Mk IV   7D   REBELT2i   550D , you can operate the camera and download images saved on the memory card inserted in the camera to your computer. Refer to your camera's Instruction Manual for details.

Batch Downloading Images to Your Computer

You can batch download to your computer all the images saved on the memory card inserted in the camera that you have not already downloaded.

The downloaded images are sorted by date into folders and are then displayed in the main window of Digital Photo Professional (RAW image processing, viewing and editing software) (hereinafter DPP), which is linked to start up automatically, where you can check them immediately.
1 Click [Starts to download images].
Save File dialog box
➔ The [Save File] dialog box appears and image downloading to your computer begins.

➔ The downloaded images are saved in the [My Pictures] folder.

● When all images have been downloaded, DPP starts up automatically and the downloaded images are displayed in DPP's main window.

2 Check the downloaded images.

DPP Main window
● Check the downloaded images in DPP.
  For details on using DPP, refer to the "Digital Photo Professional Instruction Manual" (PDF electronic manual).

● Continue with "Exiting EU" .

● When you download images, you can change the software that starts up from DPP to ZoomBrowser EX or other software in preferences ([Linked Software] tab sheet) .

● You can change the save destination for images downloaded and images to download in preferences ([Destination Folder] tab sheet, [Download Images] tab sheet) .

● Downloading movie files may take some time due to the large file size.

Downloading Selected Images to Your Computer

From the images saved in your camera's memory card, you can select the ones you want and download them to your computer.

1 **Click [Lets you select and download images].**

→ A viewer window appears and the images in the memory card are displayed.

2 **View the images and checkmark images to download.**

Viewer window
Add check mark

3 **Click the [Download] button.**

→ The [Download image] dialog box appears.

4 **Specify the save destination and then click the [OK] button.**

Displays the save destination on the computer

Download image dialog box

```
EOS Utility - Download image

Specify File Name
    📁 C:\Users\canon\Pictures
        📁 2008_04_22
            📄 .xxx

(xxx: file extension will be the same as the original file name)

    [ Destination Folder... ]    [ File Name... ]

        [ OK ]              [ Cancel ]
```
Specify the save destination
→ The [Save File] dialog box appears and image downloading to your computer begins.

→ The images downloaded to your computer are displayed in the [Quick Preview] window.

```
Quick Preview : IMG_0012_1JPG
```

● The [Quick Preview] window allows you to quickly review the downloaded images. You can also resize the [Quick Preview] window.

● When all images have been downloaded, DPP starts up automatically and the downloaded images are displayed.

● To switch to the main window, click the [Main Window] button in the viewer window.

● In step 2, you can batch checkmark several images in sequence. After clicking the first image you want to download, hold the < Shift > key and click the last image, and [☑ ☐] will be displayed. By clicking the [☑] button, the selected images will be checkmarked in a batch.

● For a list of viewer window functions, refer to .
Downloading Images with a Card Reader

For users with a third-party card reader, you can also download to your computer images stored in a memory card using the card reader. However, EU does not support image downloading using a card reader. For this reason, when downloading images using a card reader, use one of the following 3 procedures.

Downloading Images Using Digital Photo Professional

You can use DPP to download to your computer shot images from a memory card inserted in a third-party card reader connected to your computer.

For detailed instructions, refer to "Downloading Images Using Your Card Reader" in the "Digital Photo Professional Instruction Manual" (PDF electronic manual).

Downloading Images Using ZoomBrowser EX

You can use ZoomBrowser EX to download to your computer shot images from a memory card inserted in a third-party card reader connected to your computer.

For detailed instructions, refer to "Downloading Images Using Your Card Reader" in the "ZoomBrowser EX Instruction Manual" (PDF electronic manual).

Downloading Images without Using Canon Software

To download images with a card reader without using Canon software such as DPP or ZoomBrowser EX, copy to your computer the [DCIM] folder in the memory card.

For more details about folder structures and files in the memory card, refer to .

Exiting EU

1 **Click the [Quit] button.**
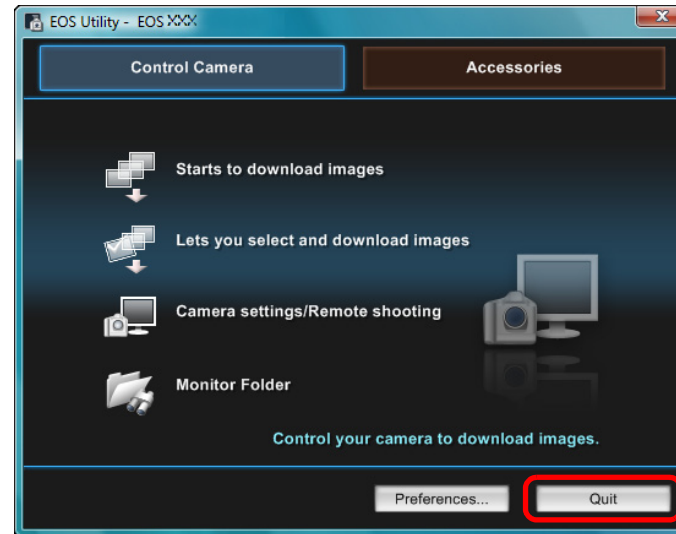

➡ The window closes and EU exits.

2 **Turn the camera's power switch to < OFF >.**

3 **Disconnect the cable from the camera and computer.**

● Do not pull on the cable; hold the plug and pull out.

Setting the Camera Owner's Name, Copyright Notice and Date/Time

You can set and apply to the camera, the camera owner's name, copyright notice and date/time recorded as shooting information in shot images.

**1** **Connect your camera and computer, and then start up EU** (p.5)**.**

2 **Click [Camera settings/Remote shooting].**

→The capture window appears.

3 **Click the [🔧] button.**

Capture window

→The [Set-up menu] appears.

4 Click the required setting and specify each one.

Set-up menu
- Available settings are displayed for the camera that is connected. For more details, refer to "Available Settings by Camera Model" (Description on the below).

📝 For a list of the capture window functions, refer to p.70.

Available Settings by Camera Model

Setting	1Ds Mk III 1D Mk III	1D Mk IV 5D Mk II 7D 50D REBELT2i 550D REBELT1i 500D	40D	REBELXSi 450D REBELXS 1000D
Owner's name	○	○	○	○
Author	–	○	–	–
Copyright holder (copyright notice)	–	○	–	–
Date/Time	○	○	○	○
Live View/Movie func. set.*1	○	○	○	○
Firmware	○	○	○	○

Owner's name
- You can enter and set up to 31 characters as the camera owner's name.

Author*2
- You can enter and set up to 63 characters or symbols, including a prefix, as the author's name.

Copyright holder (copyright notice)*2
- You can enter and set up to 63 characters or symbols, including a prefix, as the photo creation's copyright holder (copyright notice).

Date/Time
- You can set the camera's date and time.

Live View/Movie func. set.*1
- You can set whether the Live View function settings or Movie function settings (p.26, p.40) are available or not.

Firmware
- You can display the version of the camera's firmware.
- You can update the firmware by clicking on this item.
- For more details on updating firmware, refer to the Canon's website.

*1 Movie function settings are for 1D Mk IV 5D Mk II 7D REBELT2i 550D REBELT1i 500D only.
*2 When the author or copyright holder (copyright notice) set is not displayed in full, moving the cursor to the displayed setting item will display all the entered information as a pop-up.
13
Setting up Camera Functions

You can set and apply to the camera Picture Styles, personal white balance, JPEG quality and white balance adjustment.

1 **Connect your camera and computer, and then start up EU** (p.5)**.**

2 **Click [Camera settings/Remote shooting].**

➜ The capture window appears.

3 **Click the [📷] button.**

➜ The [Shooting menu] appears.

△* Setting is possible for 40D , but not for REBELXSi 450D REBELXS 1000D .

Picture Style
● You can set a Picture Style and apply it to the camera, in the same way as operating from the camera (p.16).

Personal white balance
● You can register to the camera a personal white balance file (p.20).

JPEG quality
● You can set the JPEG image quality and apply it to the camera, in the same way as operating from the camera (p.21).

White balance adjustment
● You can adjust the white balance, in the same way as operating from the camera (p.22).

Registering peripheral illumination correction data
● You can register peripheral illumination correction data for the lens to the camera or delete registered data from the camera (p.22).

📖 For a list of the capture window functions, refer to p.70.
## Setting Picture Styles and Applying to the Camera

You can set and apply Picture Styles to the camera, in the same way as operating from the camera. You can change the values for [Sharpness], [Contrast], [Saturation] and [Color tone] of each Picture Style and register up to three of your own Picture Styles in the camera as user-defined settings.

You can also register Picture Style files in the camera as user-defined settings you have downloaded from the Canon's website or created with Picture Style Editor (Picture Style file creating software) (hereinafter PSE) and saved to your computer.

For REBELT2i 550D , registering Picture Styles may take some time.

Selecting a Picture Style and Applying to the Camera

1 **Click [Picture Style].**

→ The [Picture Style] window appears.

2 **Click the Picture Style to be set in the camera.**

Picture Style window
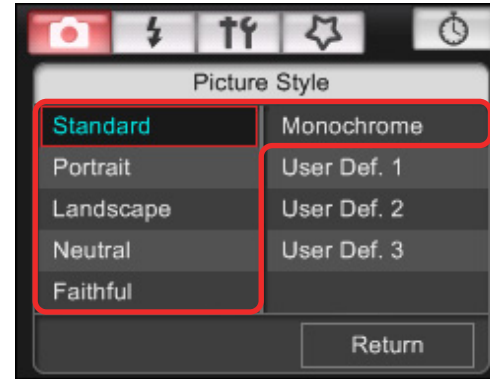

→ The setting is applied to the camera and the display returns to the [Shooting menu].

Saving White Balance to your Computer

📷 1D Mk IV   1Ds Mk III   1D Mk III   40D

You can save the adjustment results for an image's white balance to your computer as a white balance file (extension ".WBD"). White balance files saved to your computer can be registered in the camera as personal white balances (p.20).

1D Mk IV

Start by registering a white balance in your camera after adjusting it in the [Remote Live View window] or [Test Shooting] window.

1 **Click [Personal WB].**
→The [Personal white balance settings] dialog box appears.

📝 ● A Picture Style file is an extended function of Picture Style. For more details on Picture Style files, refer to the Canon's website.
● The Picture Style files that you can apply to the camera are files with the ".PF2" extension only.
● For details on using PSE, refer to the "Picture Style Editor Instruction Manual" (PDF electronic manual).

19
2 Select the white balance to be saved to your computer and click the [Save] button.
3 In the window that appears, enter a filename, select a save destination, and then click the [Save] button.

→ The white balance file is saved to your computer.

[1Ds Mk III] [1D Mk III] [40D]

To adjust white balance and save the results to your computer, start up RAW Image Task from ZoomBrowser EX. For more information on RAW Image Task, refer to the "ZoomBrowser EX Instruction Manual" (PDF electronic manual).

Registering Personal White Balance in the Camera

[1D Mk IV] [1Ds Mk III] [1D Mk III] [40D]

White balance files created by adjusting the white balance of an image and saving the results can be registered in the camera as personal white balances.

1 Click [Personal WB].
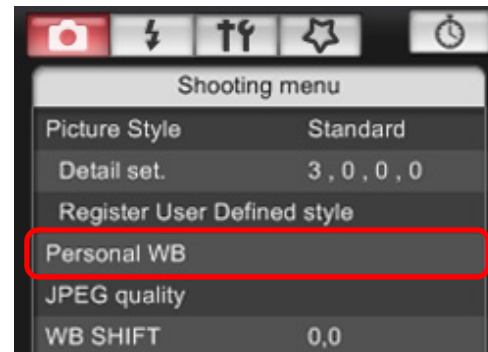

→ The [Personal white balance settings] dialog box appears.

2 Select the personal white balance to be registered and click the [Open] button.
→ The [Open] dialog box appears.

3 **Open the folder containing the saved white balance file, select the file and then click the [Open] button.**

➜ The white balance file is loaded.

● The white balance files that you can register to the camera are files with the ".WBD" extension.

4 **Enter a title into the [Title] input field.**

● You cannot enter the title on 40D .

5 **Click the [Apply to camera] button.**

➜ The personal white balance is registered on the camera.

● This is registered as manual white balance on 40D .

● To register another setting, repeat step 2 to step 5.

6 **Click the [Close] button.**

➜ The [Personal white balance settings] dialog box closes and the display returns to the [Shooting menu].

7 **Select a registered personal white balance on the camera.**

● Select a registered personal white balance (1D Mk IV 1Ds Mk III 1D Mk III) or manual white balance (40D) as the white balance.

● For selecting personal white balance or manual white balance, refer to "Selecting the White Balance" (1D Mk IV 1Ds Mk III 1D Mk III) or "Setting the White Balance" (40D) in the camera's Instruction Manual provided with your camera.

Setting JPEG Quality and Applying to the Camera

📷 1D Mk IV 1Ds Mk III 1D Mk III

You can set the JPEG image quality and apply it to the camera, in the same way as operating from the camera.

1 **Click [JPEG quality].**
➜ The [JPEG Quality] window appears.

2 **Click the setting position.**
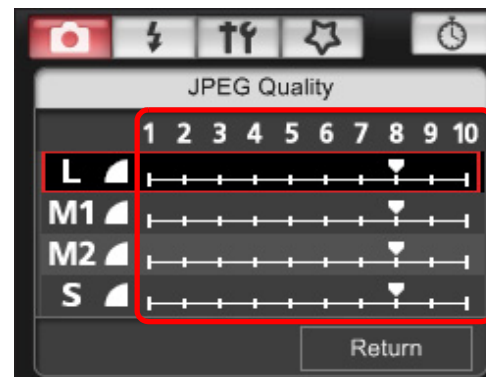

➜ The settings are applied to the camera.

● Higher values give a lower compression ratio and higher image quality for any size.

3 **Click [Return].**

➜ The display returns to the [Shooting menu].

3 **Select the lens for which you want to register correction data and click the [OK] button.**
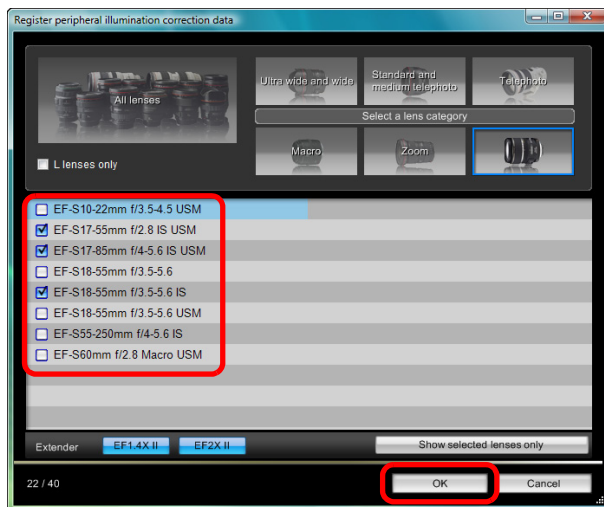

→ The correction data for the selected lens is registered in the camera.

Setting My Menu and Registering to the Camera

You can register up to six frequently used menu items as My Menu and register them to the camera, in the same way as operating from the camera.

You can register top layer items of each tab as well as all items of Custom Functions.

1 **Connect your camera and computer, and then start up EU (p.5).**

2 **Click [Camera settings/Remote shooting].**
→ The capture window appears.

📄 ● For a list of the [Register peripheral illumination correction data] window functions, refer to p.68.

● Lens names displayed in the [Register peripheral illumination correction data] window may be partially shortened depending on the lens type.
3 Click the [⭐] button.

→ The [My Menu] appears.

4 Click [My Menu settings].

My Menu
→ The [My Menu settings] window appears.

5 Select the item to be registered and click the [Add] button.

My Menu settings window
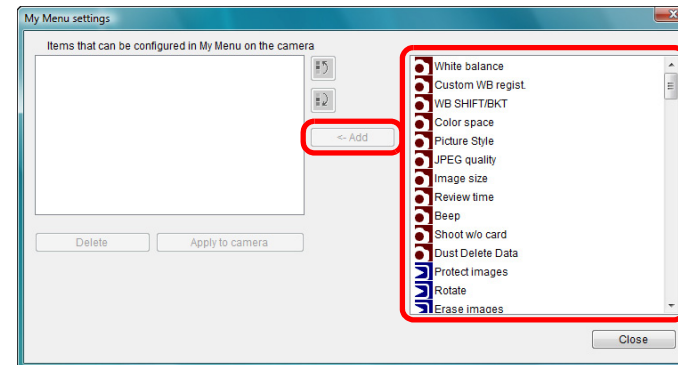

→ The selected item is added to [Items that can be configured in My Menu on the camera] on the left side of the window.

● You can register up to six items with the above procedure.

● You can change the position of an item by selecting it and then clicking the [⤵] or [⤵] button to move it.

6 Click the [Apply to camera] button.

→ The setting is applied to the camera.

You can control your camera remotely from EU and shoot still images from your computer screen.

Also, the shot image is saved directly on your computer and you can recheck it using the linked software Digital Photo Professional (hereinafter DPP).

This function is effective for shooting large numbers of shots with fixed-framing such as for studio shooting.

1 **Connect your camera and computer, and then turn the camera's power switch to < ON >.**

→ EU starts up.

● REBELT1i   500D   cannot communicate with EU if the camera's mode dial is set to < '🎥 >. Set the mode dial to a mode other than < '🎥 >.

2 **Click [Camera settings/Remote shooting].**
→ The capture window appears.

3 **Set the camera and click the [🔧] button.**
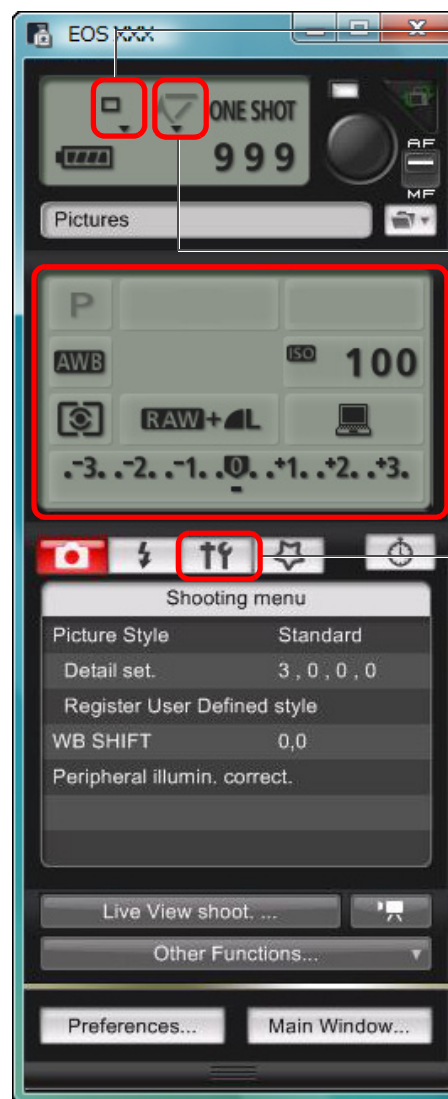

Drive mode setting: Right-click ▼ under the setting item and select settings from the menu*1 that appears 1D Mk IV   5D Mk II   7D   50D   REBELT2i   550D   REBELT1i   500D

Remote Live View Window Functions

These pages explain the functions available in the [Remote Live View window], including checking the camera settings and focusing while viewing your subject on the computer screen.

Focusing Manually

You can focus manually while viewing the enlarged image in the [Remote Live View window].

1 **Set the lens's focus mode switch to < AF >.**

2 **Drag [ ] to the section you want to enlarge.**

Drag

📖 ● You cannot operate the camera when the [Remote Live View window] is displayed. Pressing the camera's < SET > button (Live View shooting button on `5D Mk II` `7D` `50D` `REBELT2i` `550D` `REBELT1i` `500D`) will also display the Live View image on the camera's LCD monitor, allowing you to view the image while controlling the camera.

● On `5D Mk II` `7D` `50D` `REBELT2i` `550D` `REBELT1i` `500D` , when the cursor is on the capture window's ● button, the shooting mode will not change even if you operate the camera's Mode dial.

● You can shoot by operating the capture window, even if the [Remote Live View window] is not displayed.

● To perform exposure simulation (p.34) with [Remote Live View window] or enable display of histograms (p.73), set your camera's Custom Function [Live View exposure simulation] to [Enable]. On `1D Mk IV` `5D Mk II` `7D` `50D` , set [Exposure simulation] in the menu to [Enable].

● On `1D Mk IV` `5D Mk II` `7D` `50D` `REBELT2i` `550D` , you can also use mirror lockup with remote shooting (You cannot take test shots after setting mirror lockup.). On `1D Mk IV` , you can also use silent single shooting.

● With `1Ds Mk III` `1D Mk III` , mirror lockup and silent single shooting cannot be performed in remote shooting.

● The [Test Shooting] window appears when you click the [Test shooting] button.
During flash shooting, you can take a test shot under the same conditions as an actual shot, and adjust the white balance based on the shot test image (p.35).

● You can save shot images to both your computer and a memory card by checkmarking [Save also on the camera's memory card] in preferences ([Remote Shooting] tab sheet) (p.57).

● You can change the software that starts up automatically when remotely shot images are transferred to your computer from DPP to ZoomBrowser EX or other software in preferences ([Linked Software] tab sheet) (p.57).

● For a list of the [Remote Live View window] functions, refer to p.73.

● For a list of the [Zoom View] Window functions, refer to p.74.

Focusing Using AF

📷 | 1D Mk IV | 5D Mk II | 7D | 50D | REBELT2i | 550D | REBELT1i | 500D |

In Quick, Live and Face Detection Live AF modes, images can be focused automatically in the same way as on the camera itself.
Focusing Using Quick Mode

📷 | 1D Mk IV | 5D Mk II | 7D | 50D | REBELT2i | 550D | REBELT1i | 500D |

1 **Select [Quick mode] from the list box.**

→ The AF points appear.
● You can switch between showing and hiding the AF points by clicking the [🔲] button.

**2** **Select an AF point selection method from the list box.**

● Selectable items differ depending on the camera settings.

3 **Click the AF point in the position where you want to focus.**
Click

● If [Automatic selection] is selected in step 2, all the AF points are automatically selected.

4 **Click the [ON] button.**

→ AF is executed.
→ When focus is achieved, the camera makes a beeping sound and the AF point turns red.

⚠ On [7D], cancel the AF point registration function on the camera if AF points have been registered. When the camera's AF points are registered, focusing with AF in the [Remote Live View window] may not be performed properly.

📝 ● Double-clicking an AF point also performs AF.
● To cancel AF operation, click the [OFF] button.
Focusing Using Live Mode

📷 1D Mk IV 5D Mk II 7D 50D REBELT2i 550D REBELT1i
500D
1 Select [Live mode] from the list box.

➡ The AF point appears.
● You can switch between showing and hiding the AF point by clicking the [🔲] button.

2 Drag the enlargement display frame to move it to the position where you want to focus.

Drag

3 Click the [ON] button.

➡ AF is executed.
➡ When focus is achieved, the camera makes a beeping sound and the AF point turns green.
● If focus is not achieved, the AF point turns red.

Focusing Using Face Detection Live Mode

📷 ⬜1D Mk IV⬜ ⬜5D Mk II⬜ ⬜7D⬜ ⬜50D⬜ ⬜REBELT2i⬜ ⬜550D⬜ ⬜REBELT1i⬜
⬜500D⬜

1 **Select [Face Detection Live mode] from the list box.**

➡ When a face is detected, an AF point appears.
● When there is a face other than the face detected in the scene, a new AF point appears if you move the cursor to the position of the other face. Clicking that position then selects the AF point.
● You can switch between showing and hiding the AF point by clicking the [📷] button.

2 **Click the [ON] button.**
➡ AF is executed.
➡ When focus is achieved, the camera makes a beeping sound and the AF point turns green.
● If focus is not achieved, the AF point turns red.
● If the camera cannot detect a face, the AF point is fixed to the center to focus.

Checking the Depth of Field and Exposure

You can check the depth of field and exposure in the [Remote Live View window].

Click the [ON] button.
➡ The aperture value (exposure simulation) is set in the capture window (p.70).

## White Balance with the Remote Live View Window

You can change the white balance of an image in the [Remote Live View window] and register the changed white balance in the camera.

1 Select the white balance to apply to the image.

→ The selected white balance is applied to the image displayed in real time and you can check it in the [Remote Live View window].

### 2 Checkmark [Apply to shot images].
→ The selected white balance is registered in the camera as a personal white balance and applied to images that will be taken.

White Balance for Flash Photography

When taking flash shots where the subject is illuminated instantaneously, you can take a test shot under the same conditions as an actual shot, and adjust the white balance in the [Test shooting] window based on the shot test image. Also, you can take a test shot even when flash is not used.
You can perform the same operation by clicking the [Test shooting] button in the [Remote Live View window].

1 Click the [Other Functions] button and select [Test shooting] from the menu that appears.
→ The shot image is displayed in the [Test Shooting] window.

Adjusting the Horizontal/Vertical Alignment of the Camera

You can display gridlines in the [Remote Live View window] in the same way as the camera's Live View function, and adjust the horizontal/vertical alignment of the camera.
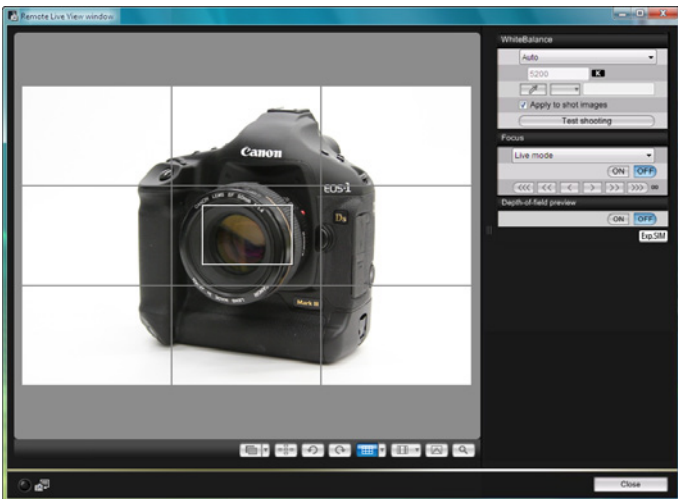

1 **Click the [▼] button, and select a grid display from the menu that appears.**

2 **Click the [⊞] button.**

→ Gridlines are displayed in the [Remote Live View window].

3 **Move the camera to adjust the horizontal/vertical alignment.**

● To remove the gridlines, click the [⊞] button again.

Changing the Aspect Ratio

📷 1D Mk IV 1Ds Mk III 1D Mk III 7D

As with the camera's Live View function, it is possible to shoot with a feeling similar to film-type medium-format/large-format cameras such as 6 × 6 cm, 6 × 4.5 cm and 4 × 5 inches.
Aspect ratio information is also attached automatically with a shot image, and when viewing it with DPP, the image is displayed as an image trimmed based on the aspect ratio information.
Further, aspect ratio information is only attached with the shot image, and the image itself is not actually trimmed.

1 **Click the [▥▾] button and select the aspect ratio.**

→ In the [Remote Live View window], the vertical lines of the aspect ratio you selected is displayed.
2 **Move the camera and compose your picture.**

● To revert the aspect ratio to the normal condition, click the [▥▾] button and select [Off].

Overlaid Display Function

An image saved in your computer can be overlaid on top of the image displayed in the [Remote Live View window]. As this function allows to accurately align angles, it is useful when aligning product photos or shooting several images at the same angle.
Images loaded from your computer are only displayed, and are not included in the shot.

1 Click the [🖼] button.

➔ The [Open] window appears.

**2 Select the image you want to display as an overlay and click the [Open] button.**

● Images that can be displayed as an overlay are JPEG, TIFF, BMP (bitmap), and GIF images.
● Even with supported image file types, the display of the image as overlay may not be possible.
● For images displayed as overlay, image size equal or inferior at 1200 x 800 pixels and 3:2 aspect ratio are recommended.
● Images with aspect ratios other than 3:2 will be distorted and displayed with a 3:2 aspect ratio.
➔ The image selected in the [Remote Live View window] is displayed as an overlay. A composite ratio slider is displayed above the [🖼] button.
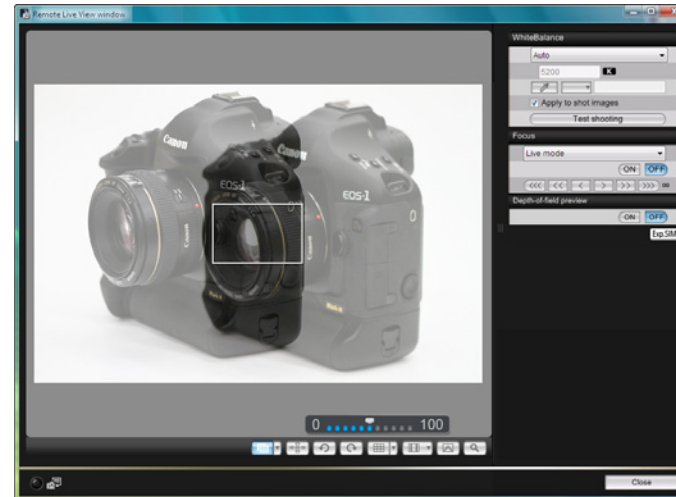

3 Move the camera and subject to compose your picture.

● You cannot use the Overlaid Display function in the [Zoom View] window.
Setting the Composite Ratio

The composite ratio can be set from 0 to 100% in increments of 10%.
Use the composite ratio slider to set the composite ratio.

1 **Move cursor over the slider.**

> 0 •••••••••• 100

→ The slider changes from white to blue and becomes movable.

2 **Hold the right mouse button and drag the slider left or right to set.**

> 0 •••••••••• 100   ——— Drag left or right

● You can also move the cursor over the slider, and then press the <←> or <→> key on the keyboard or use the scroll-wheel on your mouse to set the composite ratio.
→ The composite ratio set with the composite ratio slider is applied to the overlaid display.

Hiding the Overlaid Display Temporarily

You can temporarily hide the overlaid display.

Click

→ The overlaid display is temporarily hidden.
● Click again to show.

Setting a Different Image as Overlaid Display

Switch the image displayed as an overlay to another image.

1 **Click the [▼] button to the right of the [⬚] button and select [Open] from the menu that appears.**

> Open…
> Off

→ The [Open] window appears.

2 **Select the image you want to switch in the [Open] window and click the [Open] button.**

→ The displayed image switches to the selected image.

Exiting the Overlaid Display Function

Click the [▼] button to the right of the [⬚] button and select [Off] from the menu that appears.

> Open…
> Off

→ The Overlaid Display function terminates.

39
Shooting by Operating the Camera

Even when remote shooting is set, you can still operate the camera and shoot – as when shooting with only the camera. Also, since the shot images are saved to your computer's hard disk, you can shoot large quantities without having to worry about the capacity of the memory card.

1 **Display the capture window** (p.26).

2 **Press the camera's shutter button and take a shot.**

→ The shot images are transferred to the computer, DPP starts up automatically, and the shot images are displayed.

When the [Remote Live View window] is displayed, press the camera's < SET > button (Live View shooting button on the 5D Mk II | 7D | 50D | REBELT2i | 550D | REBELT1i | 500D) to display the Live View image on the camera's LCD monitor and operate the camera.

Shooting Movies

1D Mk IV | 5D Mk II | 7D | REBELT2i | 550D | REBELT1i | 500D

You can control your camera from EU and shoot movies from your computer screen. You cannot shoot movies without a memory card in your camera.

1D Mk IV
1 **Prepare for Live View shooting.**

● Follow the procedure from step 1 to step 3 for "Remote Live View Shooting" (p.26).

**2** **Click [Live View/Movie func. set.].**
→ The [Live View/Movie func. set.] window appears.

3 **Select [Movies] for [LV func. setting], and select the movie recording size from the list box.**

After specifying [Destination Folder] and [File Name], click the [Download] button in the window, and image data will be downloaded from the camera's memory card to your computer. Image data having a check mark removed from its file name are not downloaded. Afterward, when downloading image data to your computer from the camera's memory card, use the method described on p.7 to p.10 of this Instruction Manual to download.
48

Timer-controlled Shooting

Two types of timer shooting are available where the camera automatically takes shots at a specified time or a specified number.

Timer Shooting

You can automatically take a shot when the specified time elapses.

1 **Display the capture window** (p.26)**.**

2 **Click the [⏱] button.**

➡ The [Timer shooting settings] dialog box appears.

3 **Enter a delay time and click the [Start] button.**

● Enter a value between 0 seconds and 99 minutes and 59 seconds in one-second increments.

➡ The shot is taken when the specified time elapses.

Interval Timer Shooting

You can automatically take shots by setting the interval between shots and the number of shots to be taken.

1 **Display the capture window** (p.26)**.**

2 **Click the [⏱] button.**

➡ The [Timer shooting settings] dialog box appears.

3 **Checkmark [Interval timer shooting].**

4 **Enter the shooting interval and the number of shots.**

● Enter a value between 5 seconds and 99 minutes and 59 seconds in one-second increments.

● The minimum number of interval-timed shots is two. The number of shots you can take at timed intervals depends on the available space on your computer's hard disk.

5 **Click the [Start] button.**

➡ The shots are taken at the specified intervals and for the specified number of shots.

⚠ On certain types of computer, if you set a short interval between shots and there is insufficient time to transfer and save the images, it may not be possible to take shots at the specified interval. In this case, set a longer interval between shots and take the shots again.

📋 The shooting mode cannot be changed when the [Timer shooting settings] dialog box is displayed.
Display the [Timer shooting settings] dialog box after setting the shooting mode.

⚠️ If the [Flash control] menu is displayed on the camera's LCD monitor, EU [Flash function settings] window automatically closes.

📝 ● You can use modeling flash by clicking the [Modeling flash] button. You should only use modeling flash for a maximum of 10 times continuously. (For more information, refer to the Instruction Manual provided with the flash.)

● Information displayed in the [Flash function settings] window is updated by clicking the [📷] button, so it is synchronized with the current flash settings. (Since setting changes made with the flash unit are not reflected in the [Flash function settings] window, you can click the [📷] button and update the [Flash function settings] window to match the current flash settings.)

● You can name and save the flash setting as a file separate from the image by clicking the [Save] button. You can also click the [Load] button and load this file into EU for use in other shooting.

● You can use flash shooting and Remote Live View shooting (p.26) together.
However, you cannot use modeling flash during Remote Live View shooting.

● Settings that can be performed in the [Flash function settings] window differ depending on the flash and camera.

7 Click the [⬤] button to shoot.

→ The shot image is transferred to your computer and displayed in the [Quick Preview] window. Then, DPP starts up automatically.

● When the capture window AF/MF selector is set to [AF], AF/AE is executed when the cursor is moved to the [⬤] button (p.70).

● You can quickly review the shot image in the [Quick Preview] window displayed before DPP starts up. You can also resize the [Quick Preview] window.

● You can show/hide the [Quick Preview] window by clicking the [Other Functions] button in the capture widow and selecting [Quick Preview] from the menu that appears.

📝 ● For a list of [Flash function settings] window functions, refer to p.72.

● You can also shoot using the <space> bar on the keyboard.
You can change each of the EU functions on each tab sheet of the preferences window to make them easier to use.

## 1 On the main window, click the [Preferences] button.

➔ The [Preferences] dialog box appears.

2 Specify the required settings and click the [OK] button.

➔ The settings are applied to EU.

Basic Settings

You can specify the operation when EU starts up and whether the auto power off function is enabled or disabled.

⤷ ● When [Show [Lets you select and download images] screen] is selected in [Startup Action], the viewer window (p.67) appears.
  ● When [Show [Camera settings/Remote shooting] screen] is selected in [Startup Action], the capture window (p.70) appears.
  ● When [Execute [Starts to download images]] is selected in [Startup Action], the [Save File] dialog box (p.7) appears and downloading to your computer begins. When all the images have been downloaded, DPP starts up automatically and the downloaded images are displayed in DPP's main window.
  ● If you checkmark [Auto power off], the camera's auto power off function is enabled. If you remove the check mark, the auto power off function remains disabled, even if you set the auto power off function on the camera (only when the camera is connected to a computer.).
  ● If you checkmark [Add WFT Pairing Software to the Startup folder], the WFT pairing software is added to the Windows start menu.

Destination Folder

You can specify the save destination folder of images downloaded from your camera or of images shot remotely.

File Name

You can specify the file name of images downloaded from your camera or of images shot remotely.

⊞ ● To specify a save destination folder, click the [Browse] button. After you click the [Browse] button and specify a save destination folder, a subfolder is created automatically below the save destination folder you specified.
● After you checkmark any of [Download Images], [Remote Shooting], or [Monitor Folder], a subfolder is generated when the checkmarked function is used.
● You can select the naming rule for a generated subfolder from the list box. You can also customize the naming rule for subfolders by clicking the [Customize] button.

⊞ ● When specifying an image's file name, select a naming rule for the file from the list box. (If [Do not modify] is selected, images are saved with the file name set in the camera.) You can also customize the naming rule for files by clicking the [Customize] button.
● You can set prefix characters, number of digits for serial numbers, and the start number individually for file names.
56
Download Images

From the list box, you can select the images to be downloaded when [Starts to download images] in the main window is clicked.

📄 [Images whose transfer settings were specified with the camera] in the [Settings for downloaded images] menu is only enabled for cameras capable of direct transfer of shot images. Refer to your camera's Instruction Manual for details.

Remote Shooting

You can set operations performed during remote shooting.
📄 ● If you checkmark [Save also on the camera's memory card], images shot during remote shooting will also be saved to the camera's memory card.
● If you checkmark [Rotate image], you can set a function that rotates shot images regardless of the camera's position during shooting. Set the rotation angle in the capture window (p.70).
● If you checkmark [Start Live View], the [Remote Live View window] automatically appears when the camera's Live View starts up.
● Is you checkmark [Stop Live View], the [Remote Live View window] automatically closes when the camera's Live View ends.

Linked Software

From the list box, you can select the linked software that starts up when images are downloaded from the camera or when images are shot remotely. Also, you can register third-party software as linked software by clicking the [Settings] button.
📄 ● When you have selected ZoomBrowser EX, you can specify the operation for after images are downloaded.
● In the window displayed when you click the [Settings] button, you can specify the type of images to be posted when linked third-party software is started up.

Index

This reference section has been provided to enhance your experience using EU. It contains various troubleshooting solutions, how to delete EU from your computer and explanations of the various windows.
An index is provided at the end of the chapter for you to easily find information you are looking for.

Troubleshooting

If EU is not operating correctly, refer to the items below.

Installation could not be completed correctly

● You cannot install the software if a user setting with privileges other than [Administrator] or [Computer administrator] is selected. Select a user setting with [Administrator] privileges in Windows 7/Windows Vista or [Computer administrator] privileges in Windows XP. For detailed information on selecting the user setting, refer to your computer User's Manual.

EU does not start up

● If EU does not start up even when you have set the camera's power switch to < ON >, either double-click the [EOS Utility] icon on the desktop or click the [🏁] button ([Start] button in Windows XP), select [All Programs] ▶ [Canon Utilities] ▶ [EOS Utility] ▶ [EOS Utility] to start up EU.

The card reader does not detect the SD card.

● Depending on the card reader and computer OS used, SDXC cards might not be correctly detected. In such a case, connect your camera and computer with the provided interface cable, and transfer the images to your computer.

EU and the camera are not communicating

● EU does not operate correctly on a computer if its system requirements does not meet. Use EU on a computer with compatible system requirements (p.2).

● Push the plug of the interface cable all the way into the socket. Loose connections can cause faults and malfunctions (p.5).

● Check that the camera's power switch is < ON > (p.6).

● EU and the camera may not communicate normally with a cable other than the EOS DIGITAL camera-dedicated Canon interface cable (p.5).

● Connect your camera and computer directly with the interface cable provided with your camera. Do not connect the camera via a hub; doing so may prevent EU and your camera from communicating normally.

● If you connect multiple USB devices (not including the mouse or keyboard) to your computer, the camera may not communicate normally. If the camera cannot communicate normally, disconnect USB devices other than the mouse or keyboard from your computer.

● Do not connect more than one camera to the same computer. Two or more cameras may not operate normally.

● Do not connect your camera with the computer while performing "Linked shooting" with WFT-E2 II A/B/C/D, E4 II A/B/C/D, E5A/B/C/D (sold separately). Your camera may not operate normally.

● If there is insufficient charge left in the camera battery, the camera cannot communicate with EU. Either replace with a fully charged battery or use the AC adaptor kit provided with your camera. Your computer does not supply power to the camera through the interface cable.

Communication between EU and the camera disconnected

● Operation of the auto power off function will automatically switch the camera off, disabling communication with EU, if you turn the auto power off function to [ON]. Remove the check mark from [Auto power off] in the preferences window (the [Basic Settings] tab sheet) (p.55) or set the auto power off function in the camera to [OFF].

● If you do not perform any operation while the camera and computer are connected, depending on the computer system, a confirmation message may appear on the screen asking whether you wish to continue communicating with the camera. If you do not perform an operation while this message appears, communication with your camera is discontinued and EU shuts down. In this case, turn the camera's power switch to < OFF >, then again to < ON > and start up EU.

● Do not put your computer to sleep while it is connected to the camera. If your computer goes into sleep mode, never disconnect the interface cable while your computer is still in sleep mode. Always wake your computer up while it is still connected to the camera. Depending on the type of computer, disconnecting the interface cable while your computer is in sleep mode could prevent the computer from waking up correctly. Refer to the computer User's Manual for more information on sleep mode.

Remotely shot images using EU are not displayed in DPP

● In Digital Photo Professional, select the [Tools] menu ▶ [Sync folder with EOS Utility].
Monitor Folder Function (Function for Use with the WFT-E2/A, E2 II A/B/C/D, E3/A, E4/A, E4 II A/B/C/D, or E5A/B/C/D)

This is a function for checking your images with Digital Photo Professional (hereinafter DPP) in real time using the Wireless File Transmitter WFT-E2/A, E2 II A/B/C/D, E3/A, E4/A, E4 II A/B/C/D, or E5A/B/C/D (sold separately).
For setting the WFT-E2/A, E2 II A/B/C/D, E3/A, E4/A, E4 II A/B/C/D, or E5A/B/C/D refer to the Instruction Manual provided with each product.

1 Click [Monitor Folder].
➡ The [Monitor Folder] dialog box appears.

2 Click the [Browse] button and specify the save destination folder for shot images.

● You can specify the save destination folder for the shot images set in the WFT-E2/A, E2 II A/B/C/D, E3/A, E4/A, E4 II A/B/C/D, or E5A/B/C/D.

3 Click the [Change] button and specify the transfer destination folder.
4 Click the [🗁] button.

➡ Image transfer preparation is complete.

5 Take a shot.

➡ If images are saved in the folder specified in step 2, they are transferred/saved in the folder specified in step 3.

➡ DPP starts up and the images saved in the folder specified in step 3 are displayed.

⚠ You cannot specify the same folders in step 2 and step 3.

📄 You can change the software that starts up in step 5, from DPP to ZoomBrowser EX or other software in preferences ([Linked Software] tab sheet) .

Function for Use with the Accessories

If you have the Wireless File Transmitter WFT-E2/A, E2 II A/B/C/D, E3/A, E4/A, E4 II/A/B/C/D, or E5A/B/C/D (sold separately) or the Original Data Security Kit OSK-E3 (sold separately), you can start up the previously mentioned accessory software from EU. And you can also start up the Picture Style Editor (Picture Style file creating software).

For details on using each software, refer to the instruction manual for the software. For Picture Style files, refer to p.18.

1 **Connect your camera and computer, and then start up EU (p.5).**

2 **Click the [Accessories] tab.**

➜ The [Accessories] tab sheet appears.

3 **Click the software you want to start up.**

➜ The clicked software starts up.

62
Folder Structure and File Names in the Memory Card

Images shot with the camera are saved in the memory card's [DCIM] folder with the following folder structure and file names. Refer to the following when copying images to your computer using a card reader.

DCIM — xxxEOS1D or xxxCANON

File name	File type
****YYYY.JPG	JPEG image file
****YYYY.CR2	RAW image file
****YYYY.MOV	MOV movie file
****YYYY.THM	Thumbnail file
****YYYY.WAV	Audio file

● The camera specific character string set at the time of factory shipment or set in the camera appears in "****" of the file name.
● The "YYYY" in the file names represents a number between 0001 and 9999.

CANONMSC — Contains a file allowing the camera to manage the images in the [DCIM] folder.

● The "xxx" in the folder names represents a number between 100 and 999.
● For the 1D series cameras, the folder structure is the same for CF cards and SD cards.
● When you perform DPOF settings on the camera, a [MISC] folder is created. The files that manage the DPOF settings are saved in the [MISC] folder.
● A thumbnail file is a file saved with the same file name as the movie and includes shooting information. When you play a movie with the camera, both the movie file and the thumbnail file are required.

📝 When Adobe RGB is specified, the file names of images shot with your camera have an underscore "_" as the first character.

Uninstalling the Software

● Before starting the software uninstallation, exit all programs you are using.
● Log in under the Administrator privileges when uninstalling the software.
● To prevent computer malfunctions, always restart your computer after you have uninstalled the software. Also, reinstalling the software without first restarting your computer is likely to result in computer malfunctions.

1 **Click the [🌐] button ([Start] button in Windows XP), select [All Programs] ▶ [Canon Utilities] ▶ [EOS Utility] ▶ [EOS Utility Uninstall].**

2 **Proceed with the uninstallation as directed by the on-screen messages.**

➜ The software is uninstalled.
# Fixing the Plug to the Camera

📷 1D Mk IV 1Ds Mk III 1D Mk III

Fasten the plug to the camera with the cable protector to prevent it from detaching during remote shooting.
1D Mk IV

1 **Open the covers.**

2 **Pass the small plug of the cable through the cable protector, and pull it in the direction of the arrow.**
< ⟷ > mark

Cable protector

● Check the direction of the < ⟷ > mark on the plug and pull it in.

3 **With the plug as it is in step 2, connect it to the camera's <A/V OUT / DIGITAL> terminal.**

<A/V OUT / DIGITAL> terminal

4 **Fix the cable protector with the fixing screw.**
